Software Technology Engineering

3rd Semester

October 8, 2025

## 1 Actors

- Learners - can learn from courses
- Teachers - can create course content
- Administrators - assign teachers to courses and approve course drafts, manage users

## 2 User Stories

1. As a Learner, I want to be able to see my progress in a course so that I can track my learning journey.
2. As a Teacher I want to be able to create a course description, so that I can share my knowledge
3. As an Administrator, I want to be able to manage drafts, so that I can review, approve, or disapprove new drafts, ensuring that only approved drafts are made available for teachers to fill with course data.
4. As a Teacher I want to be able to create Learning Steps for the courses, so that the course has relevant steps which makes tracking progress easier

## 3 Use Case Descriptions

3.

Use Case	Manage Draft
<b>Summary</b>	Administrator reviews and then approves or disapproves new drafts so that only approved drafts are made available for teachers to fill with course data.
<b>Actor</b>	Administrator
<b>Precondition</b>	There are draft courses awaiting administrative review.
<b>Postcondition</b>	Scenario A: Approved drafts are marked as ready for teachers to populate with course data. Scenario B: Disapproved drafts are marked as rejected.
<b>Base Sequence</b>	1. The Administrator logs into the system. 2. The system authenticates the Administrator. [ALT1] 3. The Administrator requests a list of drafts awaiting review. 4. The system displays the list of pending drafts. 5. The Administrator selects a draft to review. 6. The system displays information about the selected draft. 7. The Administrator approves the draft. [ALT2] 8. The system updates the draft's status accordingly and confirms the action.
<b>Alternate Sequence</b>	[*ALT0] The process can be cancelled in all steps if a user desires to. Use case ends. [ALT1] If login credentials are invalid, access is denied and the Administrator is prompted to retry (Go to step 1). [ALT2] Administrator disapproves the draft.
<b>Note</b>	This use case covers requirement [TODO].

## 5 Domain Model

## 6 FAA (Frequently Answered Answers)

Administrators and Teachers can also learn on the platform (they don't need to have separate accounts for that).

Teachers can create courses but they need to be approved by an Administrator before they are visible to Learners.

Teachers can edit any course they are assigned to. They are automatically assigned to any course they create.

Learners can not create or edit courses.
