

1 Subject Info

Name (Can be nickname, anonymous, just some identifier): User1348 also known as Andrej Role (Learner, Teacher, Admin): 1st. Learner, 2nd. Teacher, 3rd. Admin Age: in his 20s Culture/Origin: Slovakia

2 Interview Questions

2.1 What would you like to have in the app? / What would you not like to have in the app?

2.1.1 As a learner:

- I think profile is unnecessary, because it doesn't show much information. But you could also add more information here, maybe some password changes
- I'd like to have a preview of available courses without having to register or sign in
- I'd like to see who made the course so that maybe I could follow or study more courses of that specific teacher
- I'd like different amount of XP for different type of questions, so that some people would not just hunt for easy courses to be on top of the leaderboard

2.1.2 As a teacher:

- It is nice that course draft feature exist, to prevent people learners accessing courses that are not meant to be in the app.
- I'd like for a tutorial or a guide on how to create lessons
- I didn't notice how to access edit steps
- I'd like to have an overview of course steps so that if I want to edit a step of a course I made, I don't have to click through all previous steps
- I'd like to have drop down menu for course category in creating draft instead of filling it manually
- When in teacher role, maybe you could have another tab for your created courses.

2.1.3 As an Admin:

- In search bar, when I type a letter I'd like priority for search results to be given to user's whose username start with this letter
 - I'd like to be able to delete a course
 - I'd like to see under draft review who created the course
 - I'd prefer to have more dropdowns over text fields or to be offered autocomplete
-

2.2 Overall experience

- User was satisfied overall with the app.
-

3 Additional Notes

- Interview and app exploring lasted 55 min
- User expressed interest in Roman Empire
- User forgot his profile name after registration
- User mentioned categories were very broad
- User experienced difficulties understanding question types and formatting
