

## 1 Subject Info

Name (Can be nickname, anonymous, just some identifier): Karina

Role (Learner, Teacher, Admin): Learner

Age: 20

Culture/Origin: Bulgaria

## 2 Interview Questions

### 2.1 How would you log in?

We need a bigger register button, the user didn't know how to make a profile.

### 2.2 How would you go to learn something about Software Engineering?

The user clicked in the course related to Software Engineering after taking a quick look at the screen.

### 2.3 How would you finish a course, not leaving it?

Went all the way until the end of the course, and successfully clicked on finish.

### 2.4 What would you like to have in the app? / What would you not like to have in the app?

Background, sounds, animations, motivation.

### 2.5 Overall experience

The user liked the experience but missed animations or motivation messages.

## 3 Additional Notes

Too dry, the background feels like in a hospital, no motivation, feels like an exam and not in a game / learning platform. Looking for something like Duolingo, animations to keep going, sounds, motivation messages. Even for adults it's great.
